DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action (12/26/08).

Response to Arguments

Applicant's arguments filed 3/26/09 have been fully considered but they are not persuasive. Claim 1 is the only independent claim; the claim is amended to add the limitation of adding anti-scaling agents, corrosion inhibitors, or disinfectants to the second solution in step b). The addition of anti-scaling agents to a feed before membrane filtration, to avoid deposits of scale forming agents to the membrane surface is known in the art, as discussed in the record (see rejection of claim 34). Applicant specification (page 17, second paragraph disclose the second solution composition containing calcium and magnesium salts, scale forming salts; these salts are also part of claim 26; the skilled artisan at the time this invention was made therefore, it would have been motivated to used anti-scaling agents to avoid membrane clogging and made the concentration with membrane more efficient. The antiscaling agents and anti-fouling agents are considered equivalent when used in membrane apparatus. For this reasons, the rejection of claim 20 and dependent claims is maintained.

The use of anti-scaling and disinfectant agents in combination with membrane and evaporators is discussed in the record, see reference to Hassan (6,508,836).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
